

ACKNOWLEDGEMENT

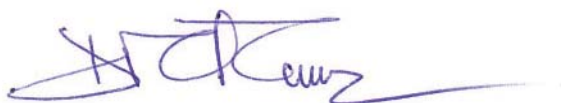

The Tanzanian *Ministry of Health and Social Welfare* (MoHSW) would like to acknowledge the following contributions, that have enabled the successful publication of the *Health Atlas: Health Service Availability in Mbeya Region-Tanzania*.

The *Tanzanian German Programme to Support Health* (TGPSH), sponsored by the *German Federal Ministry for Economic Cooperation and Development* (BMZ), financed and facilitated the process of data collection, for “Health-Geographic Information System (GIS) for Mbeya Region”, as part of a long-standing collaboration with Local Government Authorities (LGAs), at regional and national levels in Tanzania.

Special thanks go to the *Beuth University of Applied Sciences Berlin*, which developed the concept of the Health-GIS for Mbeya Region, and supported both data collection and implementation of the GIS.

The *Ministry of Lands and Human Settlements* (MLHS) and the *National Bureau of Statistics, Tanzania* (NBS), kindly provided free data, that was incorporated in the Atlas. Sincere thanks are also given to members of the *Health Management Team of the Mbeya Region* (RHMT), for their involvement, active support and assistance in the field work. Without their collaboration, data collection would not have been successful. We would also like to thank the students of the *University of Dar es Salaam* (UDSM), *Ardhi University* (ARU), and *Beuth University*, for supporting the field surveys in Mbeya Region.

Finally, we thank the *Sector Initiative Applied Research, in Health Programmes of German Development Cooperation*, on behalf of the *German Ministry for Economic Cooperation and Development*, for financing the printing of the Health Atlas.
